Kilfrost TKS fluids

In-flight de/anti-icing fluids

The TKS de/anti-icing system protects aircraft from in-flight icing by pumping fluid through a porous metal structure that forms the leading edge of the wing. Propellers and tail surfaces can be similarly protected as required.

Kilfrost TKS 406B

Manufactured to international standards (AL-5 / DTD 406B / NATO S-745)

Glycol and alcohol mix offering full de/anti-icing capability down to -60 °C

Fully biodegradable

Kilfrost TKS R328

Full de/anti-icing capability down to -60 °C

Optimised formulation to provide more efficient and faster de-icing performance

Fully biodegradable

Kilfrost TKS 80

Full de/anti-icing capability down to -60 °C

Completely non flammable

Fully biodegradable

Kilfrost TKS Sustain™

The world's first TKS fluid manufactured from 100% renewable sources

Full de/anti-icing capability down to -60 °C

Fully biodegradable
